SYNTAX

Ansell Achieves Oracle Applications Stability and Performance Gains with Move to Syntax Services

Ansell embarked on a review of its Oracle E-Business Suite Hosting service provider and, after a rigorous 18 month due diligence process, Ansell chose Syntax from a final group of 5 primary providers.

Ansell selected Syntax for many reasons. First, it liked Syntax's ability to architect environments streamlined and monitored for high performance, stability, and availability. Second, it liked Syntax's use of leading-edge, high-performance flash technologies like EMC XtremIO, near-real time, zero data loss, DR capabilities, and its SSAE 16 Type 2 and PCI security and process compliance. Finally, Ansell valued the Syntax Enterprise Cloud's comprehensive offering, without extra "out-of-scope" charges, all at competitive pricing.

Customer Profile

- Corporate HQ: Iselin, New Jersey
- Industry: Health and Safety
- Stock Symbol: ASX:ANN

www.ansell.com

Technology Footprint

- Oracle E-Business Suite R12
- Oracle ASCP R12
- Oracle GRC R12
- Oracle SOA Suite 10g
- OBIEE 10g
- Hyperion Financial Management 11
- Hyperion Financial Data Quality Management 11
- Siebel 8
- EMC XtremIO
- Citrix

Syntax Solutions

- Syntax Enterprise Cloud for Oracle EBS
- Remote Managed Services

"

Once we moved our applications to Syntax, our system response and processing times improved dramatically with programs running two to three times as fast as they did before, and reducing processing time for large jobs by over 60%, a truly remarkable performance. Syntax offers a comprehensive solution coupling leading edge technology with the technical expertise and process discipline that make it all work as it should."

SYNTAX

Ansell Achieves Oracle Applications Stability and Performance Gains with Move to Syntax Services

Ansell realized several immediate benefits upon going live. Syntax's system configuration design dramatically improved performance system-wide.

For example, Syntax's streamlined architecture allows Ansell to run OBIEE incremental loads in under 2 hours instead of 4+ hours. OTM runs now complete in 12 hours as opposed to 5 days. Ansell's sales staff can place orders in Siebel faster and Oracle EBS users now enjoy the previously rare experience of forms opening "immediately." Ansell anticipates further productivity gains once Syntax completes tuning Ansell's PL/SQL code based on insights from Syntax's proprietary monitoring systems and its highly qualified technical team.

Accomplishments

- Stabilized its Oracle environment
- Improved performance of key applications
- Reduced Oracle Trade Management run times by 90%
- Ensured business continuity with robust disaster recovery
