

Consolidate SAP Documents for Efficiency and Cost

SAP Content Repository (SCR) is a simple document storage solution that works well for on-premises SAP instances. In today's increasingly hybrid world, with on-premises and cloud SAP applications needing to work together, SCR is not optimal. The solution keeps silos that decrease efficiency and increase costs through replication.

Amazon S3 is a modern object storage system perfected for document management. As a product built from the ground up for cloud computing, it can connect with multiple SAP systems in your hybrid environment. S3 also has tiered storage classes that help organizations manage costs based on different access policies driven by data retention policies.

Open up your data sources within your organization. Minimize duplication and drive innovation through shared documents in Amazon S3.

CxLink Documents – Designed for Simplicity

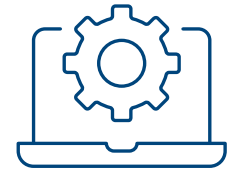

Syntax CxLink Documents leverages Syntax's in depth knowledge of both SAP and AWS. It consolidates multiple AWS tools into a single product with a simple interface, providing more efficient, faster document storage, access and recovery of SAP data. It is not a separate product; it is integrated into your SAP environment for easy access.

With CxLink Documents, you can easily define retention policies for all of your SAP documents, linking the policies to the S3 storage classes to optimize cost savings.

Even more critical, CxLink Documents is an SAP native application, written in ABAP and leveraging the ABAP SDK for AWS. As such, it is an SAP-certified solution available in both the AWS Marketplace and the SAP App Center.

In addition, CxLink Documents is managed by Syntax and is regularly updated with the latest AWS and SAP features and functions, providing the most robust document management solution available.

Key Features

- ✓ Cloud Native: Designed and build for the cloud
- ✓ SAP Certified: Business Suite Add-On
- ✓ Security focused:
 - » HTTPS communication with SSL certificates between SAP and AWS
 - » Encryption supported on client (SSF) and on server (AWS KMS)
 - » IAM Policies for restricted access
- ✓ Efficient and cost optimization by leveraging appropriate Amazon S3 storage classes
- ✓ Automated customization of archive repositories
- ✓ Web management console built with SAP Webdynpro and SAP Fiori

SAP Certified

CxLink Documents is SAP Certified for Netweaver and SAP S/4HANA 1809:

- **Assign Software Component and Namespace**
- **Package Add-On using SAP Add-On Assembly Kit**
- **Deploy using SAP Add-On Installation Tool (SAINT)**
- **Integrate with SAP NetWeaver 7.50**
- **Integrate with SAP S4/HANA**
- **Technical Uninstallation Test**
- **SAP Solution Manager Ready functionality**
