

Oracle EBS Upgrade and Consulting

Syntax provides end-to-end, Oracle E-Business Suite upgrade and implementation solutions for companies that must stay fully supported by Oracle and avoid DeSupport deadlines, need to integrate new business units into their Oracle EBS footprint, or who simply wish to take full advantage of the latest in Oracle R12 technology.

A Track Record of Oracle R12 Success

Syntax has been delivering successful upgrades to Oracle R12 for over a decade and remains the market's go-to provider for project-based Oracle R12 solutions.

We follow an established methodology that utilizes the Oracle OUM standards. We begin each project by reviewing your current setups, CEMLI's (customizations, extensions, modifications, localizations and integrations) and process flows. From there we do a GAP analysis to map your current processes and requirements to Oracle R12 functionality. With your GAP analysis complete, we deliver our recommendations on whether a simple, "vanilla" Oracle R12 technical upgrade is right for you or whether you need a full-scale E-Business Suite reimplementation or something in between. Once complete, our consulting team delivers a detailed project plan, designates a project team and defines clear milestones.

Syntax offers end-to-end support from Kickoff to Go Live, and our Oracle Application Managed Services team provides hands-on Post-Production

Support to ensure that things like transaction processing go smoothly after you are on Oracle R12.

Syntax goes a step further to ensure that you achieve the level of user acceptance and adoption that is necessary for a successful Oracle R12 upgrade. It is done by documenting process flows and business requirements, which you can use to provide training and knowledge transfer to your end users.

Oracle Consulting Solutions Delivered with a Difference

Our Oracle consulting team is vertically integrated and staffed by senior Oracle EBS functional and technical experts who are capable of deploying on-site or working remotely to execute projects throughout North and South America, Europe, and Asia.

The Syntax Consulting Services team also staffs Fusion Middleware, OBIEE, SOA and IDM experts who are able to support and guide our customers as needed. Finally, we back each of our consultants with our Managed Services and Syntax Enterprise Cloud teams, giving you 24/7 access to functional and technical expertise that spans the entire technology stack.

Contact Syntax to see how we can ensure that your next Oracle R12 project finishes successfully, on-time and on-budget.
